# HOW TO CREATE A SOCIALIST STATE

## BY SAUL ALINSKY

There are eight levels of control that must be obtained before you are able to create a socialist state. The first is the most important.

- 1) **Healthcare**—Control healthcare and you control the people
- 2) **Poverty**—Increase the Poverty level as high as possible, poor people are easier to control and will not fight back if you are providing everything for them to live.
- 3) **Debt**—Increase the debt to an unsustainable level. That way you are able to increase taxes, and this will produce more poverty.
- 4) **Gun Control**—Remove people's ability to defend themselves from the Government. That way you are able to create a police state.
- 5) **Welfare**—Take control of every aspect of their lives (Food, Housing, and Income)
- 6) **Education**—Take control of what people read and listen to – take control of what children learn in school. Think: "Common Core"
- 7) **Religion**—Remove the belief in God from the Government and schools.
- 8) **Class Warfare**—Divide the people into the wealthy and the poor. This will cause more discontent and it will be easier to take (Tax) the wealthy with the support of the poor.

The Left's Playbook > Saul Alinsky's 12 Rules for Radicals...

### **RULE 1: "Power is not only what you have, but what the enemy thinks you have."**

Power is derived from 2 main sources – money and people. "Have-Nots" must build power from flesh and blood. [These are two things of which there is a plentiful supply. Government and corporations always have a difficult time appealing to people, and usually do so almost exclusively with economic arguments.]

### **RULE 2: "Never go outside the expertise of your people."**

It results in confusion, fear and retreat. Feeling secure adds to the backbone of anyone. [Organizations under attack wonder why radicals don't address the "real" issues. This is why. They avoid things with which they have no knowledge. ]

### **RULE 3: "Whenever possible, go outside the expertise of the enemy."**

Look for ways to increase insecurity, anxiety and uncertainty. [This happens all the time. Watch how many organizations under attack are blind-sided by seemingly irrelevant arguments that they are then forced to address. ]

### **RULE 4: "Make the enemy live up to its own book of rules."**

If the rule is that every letter gets a reply, send 30,000 letters. You can kill them with this because no one can possibly obey all of their own rules. [This is a serious rule. The besieged entity's very credibility and reputation is at stake, because if activists catch it lying or not living up to its commitments, they can continue to chip away at the damage. ]

### **RULE 5: "Ridicule is man's most potent weapon."**

There is no defense. It's irrational. It's infuriating. It also works as a key pressure point to force the enemy into concessions. [Pretty crude, rude and mean, huh? They want to create anger and fear. ] --- continued in next issue.
