President's Message

[Liberty Counsel](#) founder and Chairman, Mat Staver's Freedom Alert: FDA law clearly states that individuals have "the option to accept or refuse."

Therefore, "You have the right to refuse a COVID shot. That is your choice." **Say what?** Yet, federal and some state and local governments, the VA, large corporations, and even public accommodation businesses, like restaurants, sport venues, at the same time are saying individuals do not have the right to refuse the shots by proving vaccination status. "So-called vaccine passports are a passport for entrance into life." *This is the greatest threat to our freedoms most of us have ever encountered.*

I spoke with my brother, a brainwashed democrat, this past weekend. He told me he plans to come to Tallahassee for a week just after Christmas (he lives alone in northern Virginia) to be with his son's family, who will be in town visiting too. He then asked if I had been "vaccinated" and when I said no, his reply was, "That's what I thought." And then said, that's why he'll stay in Tallahassee. (Sigh!) Well, I couldn't resist telling him a few facts. He knew nothing about the VAERS database, hadn't heard of any adverse reactions or deaths from those getting shots, that all "vaccines" were still under EUA's, didn't know about the faulty PCR tests, which produced the high numbers of Covid positive cases in 2020, etc. He did admit some of what I was saying seemed believable, yet some of it seemed far-fetched. I told him I'd be glad to share what the frontline experts are saying since his two sources of news are the NYT and NPR. It's utterly amazing to me that well educated people are so ignorant (still) of what is going on right around them after 20 months.

Dear Vaccinated, We did not take your freedom. The government did. We are not holding your freedoms at ransom. The government is. If we are a danger to you, then your vaccine doesn't work. If it does, then you should already be free. The government lied to you. ~ Unknown

Tickets are now on sale for the [KFRW 2nd Biennial American Valor Dinner](#), See page 3 for details.

The speaker at our **October 25** meeting will be our own **Sheriff Mac McNeill**. Several members have expressed concern about what they see in other counties and states regarding the erosion of our constitutional freedoms with mandates, threats, etc. Here's your chance to ask questions or express your concerns to our top law enforcement officer! *Email your questions to me and/or to Sheriff Mac.*

~ What A Time To Be Alive! ~

“Things are only getting more interesting. As the Biden administration is actively running this country into the ground, President Trump has been ramping up his messaging and he isn’t holding anything back. If you saw Trump’s rally in GA last Saturday, you saw a man who is confident and his tone and rhetoric pointed to something larger in the works.” ~ Patel Patriot

“All of us play a role in what is to come next. As more people “wake up” and are searching for answers it’s important that we are able to explain to them the reality of the situation. As I have said before, researching and writing the Devolution series has brought me peace of mind in knowing that Trump didn’t just walk away and leave us to the hands of America’s enemies.” ~ P. Patriot

dev•lu•tion | noun – the transfer or delegation of power to a lower level, especially by central government to local or regional administration.

I stumbled on [Patel Patriot’s Devolution Series](#) around Part 4; he is now up to Part 11 with two Addendums. Patel Patriot, his pen name, wasn’t into politics until 2018 when he began to wake up and ask questions, which led him to do his own research, which he is documenting in parts. “The Devolution Series outlines exactly how President Donald Trump used all the legal powers available to him as President of the United States and Commander-in-Chief of the United States Armed Forces to defeat the election theft. Donald Trump initiated a real Continuity of Government plan and left office on January 20th, but his return is imminent.” This series is not a quick read, but very informative, with links to the open-source data, that may prompt you to do your own deep-dive research, which is what we are all encouraged to do, in order to learn the truth. – Lynn S.
